

5. Proximity search: Useful pointers

What can I find by doing a proximity search?

A proximity search allows you to find facilities that are located within certain surroundings to a town or in a certain postal code area. Please enter your search criteria in the search boxes. The "status of data" information at the top right of the form shows when the information was last updated.

Reporting year:

The default setting is the current reporting year. Please select earlier reporting years as appropriate.

Town/City / Postal code:

You can enter the desired postal code or name of a town/city in this search box.

Surroundings:

You can locate facilities that are within 10, 20, 30, 40 or 50 km from the town selected above and display a result list.
