

6. Display details of selected facility

There are two ways to display details of a facility:

- **Map**

Enter the name of the facility you are looking for in the "Facility" search box, select it in the list and then click on the zoom function, or go straight to the zoom function without making a selection. You will see information about the location of the facility as well as individual facility data.

- **Search**

Enter your search criteria into the boxes. Please note you must limit your search to "All" or "Individual facility" in some cases; otherwise you will see an error message. Once you have started your search (click on the "search" button) you will receive a list of search results. You must then click on the "Map" or "Detail" icon of a selected facility to display the details.
